Advancing Your Concept to Reality

AccuLab Life Sciences

Your Leading Preclinical CRO Resource in Southern California

AccuLab Life Sciences specializes in preclinical services for medical devices, pharmaceuticals, biologics, and combination products.

AccuLab has the resources, knowledge and capability to perform a wide variety of in vitro and in vivo testing. Our unique expertise in biological, mechanical, and computational science helps facilitate the successful execution of short and long term studies.

We have over 27,000 sq./ft. of research, AAALAC-accredited vivarium and wet lab space which includes surgical and interventional suites, post recovery rooms, pathology and toxicology.

Our facilities can rapidly adapt to accommodate your most challenging preclinical models and research needs. We are a partner who becomes an integral member of your product innovation and customer training teams.
